

Engage Your Prospects with HR Assessment

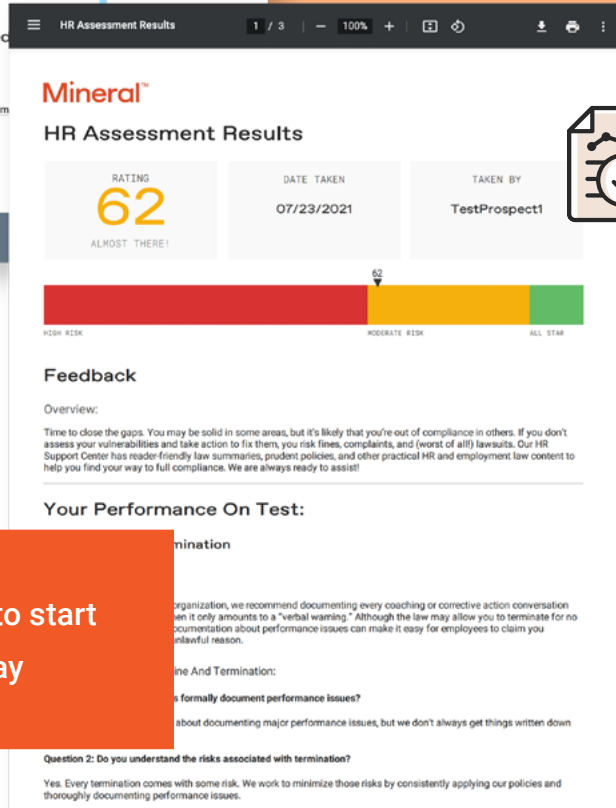

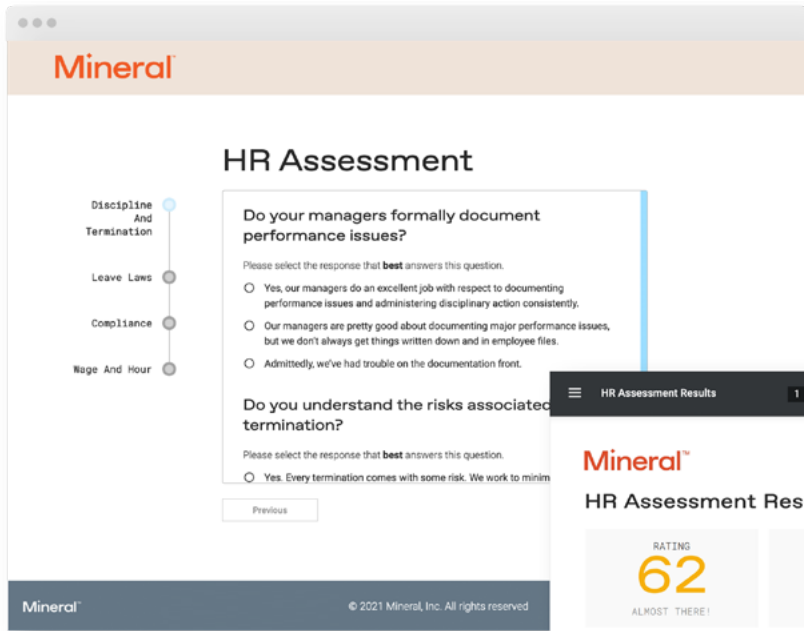

HR Assessment is an easy and interactive way to show your prospects the value of your offering by helping them discover their HR gaps. You can:

1. Send prospects a link to take HR Assessment and review their results after they complete it.

Why this is effective: Your prospects can complete the assessment when it's convenient for them. They can objectively evaluate their HR practices and have the time they need to provide the most accurate information. You're instantly emailed a copy of their results, so you can formulate a response that best meets their HR needs.

2. Take the assessment with your prospects and discuss their HR gaps in real time.

Why this is effective: Going through the assessment with your prospects gives you an unfiltered view of their current HR situation and areas where they need help. You can reassure them on the spot with an HR solution that puts them at ease and reinforces your role as a trusted advisor.
